

A heatmap visualization of a correlation matrix. The x and y axes are labeled with hierarchical clustering dendrograms. The color scale ranges from 0 (yellow) to 1 (black), with intermediate values represented by light blue and dark blue. The diagonal is black, indicating a correlation of 1. The matrix shows a block-like structure, suggesting clusters of variables with high internal correlation. The top and bottom rows are color-coded into groups: dark blue, red, green, yellow, and dark blue. The dendrogram on the left shows a hierarchical clustering of the rows, with a major split at the top and bottom. The dendrogram on the top shows a hierarchical clustering of the columns, with a major split at the left and right.
